

ELP Generator 4.5 kVA

Compact, Ultra-Quiet Generator with Smart Controls and Easy Mobility

A compact 4.5 kVA generator designed for clean, quiet operation and compact mobility. Ideal for precise electronics, mobile workstations, and power-demanding environments.

- **Super silent performance:** only 55–60 dB @ 7m
- **Space-saving footprint:** 10% smaller and stackable with flat-top design
- **Built-in fuel gauge** for direct visibility of fuel level
- **Data display panel** shows voltage, frequency, and runtime
- **Telescopic handles and wheels** for easy transport
- **Dual start options:** electric, recoil, and remote
- **Low THD (<2.5%)** safe for sensitive electronics
- **Durable build** with patented inner and outer structures for strength
- **Quick maintenance access** via removable rear cover

Technical Specifications:

- **Engine Type:** Forced air-cooled, 4-stroke, gasoline
- **Starting System:** Recoil / Electric / Remote
- **Max Output:** 4500 VA
- **Rated Output:** 3700 VA
- **THD:** <2.5%
- **Noise Level:** 55–60 dB @ 7m
- **Net Weight:** 37.7 kg
- **Certificates:** CE, EMC, EPA
