- Air cooled water chillers with helical fans from 40 kW to 156 kW, with ecological refrigerant R410A

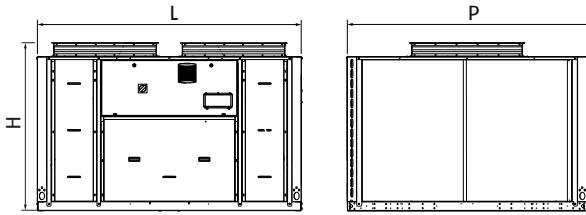

Air cooled water chillers

NXC 044÷164

MODEL 044÷084

MODEL 096÷164

Description	H mm	L mm	P mm
NXC 044÷084	1330	1090	2110
NXC 096÷164	1330	2270	2110

* Height without "Tank" option.

The NXC series units are chillers for air conditioning of commercial users for outdoor installation, available with various options to choose from such as: one pump, two pumps, with or without tank, with or without partial recoverer.

Maximum reliability and efficiency thanks to the high level of partialization: for powers up to 114 kW with two/three single-circuit Scroll compressors, while for powers of 135 kW and 156 kW with four compressors divided into two circuits. The water-side exchanger is of the brazed plate type.

The units are equipped with axial fans with external rotor with variable speed, to ensure operation with outdoor temperatures up to +46°C. Intuitive interface thanks to the touch screen control with possible M-BUS connection.

- Plug & Play solution with pump(s) on board the machine (optional)
- Low aesthetic impact thanks to the reduced height
- Easy maintenance by removing the service panels
- Touch screen control panel with possible M-BUS connection
- Condensing coil protection grilles not included.
